Blvd Winston Churchill 4, Mons
(U.S Citizen, California Resident)

PROFILE INFO

Computer Science student with hands-on experience in AI/ML, full-stack development, and IoT systems. Proven ability to design and implement intelligent systems, including predictive models and self-learning AI. Strong foundation in Python and data-driven development, with experience delivering real-world technical solutions. Seeking internship opportunities in software engineering and machine learning.

EDUCATION HISTORY

Thomas More University of Applied Sciences 2024-2027
Bachelor Degree of Applied Computer Science

WORK EXPERIENCE

Twelfth Brain - Intern

June-August 2026

- Building the ML foundation of Twelfth Brain's Voice Fingerprint - modeling executives' writing styles with stylometric features (spaCy/NLTK) and sentence-transformer embeddings (SBERT, PyTorch).
- Built feature extraction, voice embedding, and benchmarking pipelines in Python, reaching 78% author-identification accuracy on production data.

AI Labs, Kolkata

2023-2025

- Built machine learning models using Python, Pandas, and Jupyter
- Developed a diabetes prediction model achieving 93% accuracy
- Learned core concepts including neural networks, deep learning, and model evaluation

PROFESSIONAL SKILLS

- Programming Languages: Python, Java, JavaScript, HTML/CSS
- AI/ML & Data: Pandas, NumPy, Scikit-learn, Jupyter Notebooks, Tensorflow, PyTorch Keras, Qlik.
- Development & Tools: Docker, Linux (Armbian), Git, PowerShell
- Other: Full-stack development (TALL stack), PyGame, UML (StarUML)
- Languages: English, Hindi, Bengali

SOFT SKILLS

- Communication
- Adaptability and working under stress
- Cultural awareness
- Curiosity

PROJECTS

Captain Alex

March 2026

- Developed an offline IoT system communicating via SMS to support farmers in remote areas
- Built a Random Forest model to predict crop yields using satellite and weather data
- Delivered daily recommendations in English and Swahili to improve farming outcomes

Speeds7ers

February 2025

- Designed and developed a Tron-inspired game using Python, Pytorch/Tensorflow
- Implemented a self-learning AI opponent using deep learning techniques
- Created adaptive gameplay where AI improves based on player behavior
